

ZORRO

by Gerhard Zitzmann of Vienna, Austria

Bow 0.050 inch

Battens 0.030 inch

Spine

Bamboo, for the best balance of the kite shape the spine thinner from the nose towards to the wingtipline

Best Wind Range 3 – 10 mph

Before I publish the plan in the web I send a kite for testing to Bruce Lambert, his comment...I flew your orcon kite.....it is a sweetheart of a kite! I real winner!! It flies soooo well.....I would not hesitate flying it in a competition....it performs every maneuver I would want a kite to do!

Have fun with building and flying this kite !!

Gerhard
